

Yukata Guide for men

1

Collar
edge

Put yukata on,
unfold it and adjust to center,
make sure both edges of
the collar align properly.
Hold onto the bottom edges of
the collar and draw your right
hand towards your left hip.

2

Left
Side

Do not let go of yukata yet,
while slightly pulling both collar
edges down and making sure they
are on the same level, draw your
left hand towards your right hip,
making sure the left side of yukata
comes on top.

3

Leave one side of the belt
slightly longer, cross at the back
and tie tightly at the front
below your waist and around hips.

4

Smoothen out all the
visible wrinkles and make sure
yukata isn't too tight
at the back. All done!

OTHER TIPS:

- * A simple v-neck tshirt makes the best undergarment for yukata.
- * If your yukata comes with an Obi belt, the tie should always be at the back.
- * If yukata belt or obi keeps crawling up, tuck in a hand towel underneath it.
- * Always make sure the left side is on top, the opposite is only used for the kimono of the deceased.
- * If you're wearing Geta on your feet, make sure to have band aid with you because unless you're used to this type of shoes, there's a high chance of them hurting your feet.
